

**CWA Local 4250 RMC
Steve Tisza, President**

Dear CWA Retiree:

Can any of us truly feel financially secure when we retire? Will we continue to get health care benefits from our employers? Will our pensions continue to be safe? Will our Social Security and Medicare be protected or cut back and privatized?

AT&T and corporations worldwide are greedily grabbing back benefits which the CWA and other unions have attained over many years of hard won contracts. We need your help to build a strong CWA Local 4250 Retired Members' Chapter. By joining you can help us fight back against unprecedented corporate greed and their lobbyists, gluttonous politicians, the top 1%... and their lackeys in the main stream news media!

Nationwide, local RMC members serve as guardians of the benefits that CWA and other unions worked hard to achieve in negotiations with our employers at the bargaining table and through legislation in Congress. Together, we must take on those who view retirees as expendable liabilities or people on an "entitlement program" that should be eliminated or privatized.

We may be retired, but our activism as CWA members has not ended. You can be part of the growing army of tens of thousands of CWA retirees who are working with the Lifetime CWA Retired Members' Council, through their Local RMC, to protect benefits and programs that are critical to our retirement – retiree health care, pensions, Social Security, Medicare and more. We also work to elect local, state and federal candidates who will pledge to protect middle-class Americans, not sell us out to corporations and the top 1%.

CWA retirees are joining their Local RMCs for the same reasons that we organized with CWA as active workers. Many of the hard-fought benefits that we enjoy today, as both active and retired members, are never totally secure. By banding together we can sustain the collective strength of CWA to fight back against unprecedented corporate greed, lobbyists, flip-flopping politicians, and their news media servants. Working together through our Local RMC, we can strengthen CWA's bargaining power with our employers and reinforce our influence in Congress as we preserve the bottom 99% of America!

Fight Back!
