

# Benefit Fundraiser for Barb Henley

Barb Henley, 49 years young, suffered a brain aneurism and stroke August 2, 2011.

This has left Barb paralyzed on her left side. Insurance is not covering all the specialized home care and physical therapy she now needs and there are many mounting expenses that need to be taken care of.

Please help by attending with Barb's family and friends at this fundraiser to help defray the costs of her care.
