Coalition For The Future American Worker

Thank you for your concern about American jobs.

2.5 million Americans lost jobs last year and we'll lose more in 2009. Everybody is affected. The government's plan to create jobs could take years. But there are things we can do to put Americans back to work now.

Ask why we keep bringing in 1.5 million foreign workers a year to take American jobs.

More than 11 million Americans are looking for work. Yet our government allows more than 1.5 million foreign workers a year to legally enter the U.S. for jobs. That doesn't include millions of illegal foreign workers.

Ask why Congressman Luis Gutierrez wants to stop worksite enforcement against employers hiring illegal workers.

Worksite enforcement of companies hiring illegal workers is opening up jobs for Americans. But Congressman Luis Gutierrez is pressuring President Obama to stop worksite enforcement. Why would he do that to his fellow Americans in an economy like this?

What you can do to help.

1. Call President Obama at 202-456-1111 and ask him to tell Congressman Gutierrez NO on stopping worksite enforcement.
2. Call your Members of Congress at 202-224-3121 and ask them why it makes sense to bring in another 1.5 million new foreign workers this year.
3. Tell your friends about this website: <http://www.americanworker.org> and ask them to join the fight to save American jobs.
