Liz & Steve:

Only the House of Representatives can stop the Obama administration's horror-show plan to implement Bush's NAFTA-style job-killing Korea Free Trade Agreement. The vote on this deal could literally happen at any moment. That's why we need you to put pressure on Congress now to make sure this deal does not get passed.

Stopping NAFTA with Korea is key because, shockingly, it is but one of three summertime blockbuster flops that the Obama administration plans to release. If the Korea deal passes, next up are NAFTA-style deals with Colombia, the unionist murder capital of the world, and Panama, a notorious tax haven. Now more than ever we need to raise our voices and show our opposition to these NAFTA clones.

We know it's not so simple to boil down all of the problems in these 900-page nightmare deals with such diversely devastating impacts. So, we've taken a stab with this 2 minute film.

Raise the profile on an issue bigger than any fight this year! And, don't forget to tell Congress to vote NO on the NAFTA deal with Korea.

Thanks for all you do!
